

## **Integre Technologies Launches New Website**

*New Website Highlights Product and Service Offerings*

**Rochester, NY – July 29, 2010** – Integre Technologies, an engineering services and product company specializing in digital and mixed-signal design and verification, announces the launch of their new website [www.integretek.com](http://www.integretek.com).

“In the last year our business has grown significantly to now include both engineering services and off-the-shelf board level products and IP” said James Mooney, Integre’s Director of Sales and Marketing. “Our new website provides customers and partners a platform that is easy to navigate allowing them to quickly identify and collect information on our services and products.”

The Integre website now includes sections dedicated to board level product and Intellectual Property (IP) in addition to engineering services which include; Verification Services, ASIC Design Services, FPGA Design Services and PCB Design and Layout Services.
