

Integre Technologies Opens New Design Center

New Portland OR Design Center to Support Customers in the Pacific Northwest

Rochester, NY – November 1, 2016 – Integre Technologies, an engineering services and product company specializing in FPGA and ASIC design and verification, announces the opening of a new design center in Portland Oregon. The design center will provide engineering services and support to customers in the Pacific Northwest and Western US.

“Integre is known for providing exception service and support to our customers no matter where they are located” said James Mooney, Integre’s Director of Sales and Marketing. “We are excited about the new Portland Design Center and the continued commitment to support our customers in the Pacific Northwest.”

The Portland Design Center will deliver FPGA design and verification services, ASIC design and verification services, and will also contribute to the development of the Integretek line of FPGA IP products.

About Integre

Integre Technologies is an engineering services and product company specializing in digital design and verification. Integre’s capabilities include: FPGA and ASIC design and verification including multi-million gate SOC's, Mixed Signal ASIC Design and Circuit Board Design and Layout. Integre delivers solutions to both the commercial and mil/aero/secure communities, engineering ground, air and space based products. Integre is headquartered in Rochester, New York.
